

FOLO WHITE PAPER

The Beginning of the Folo Universe

1. Introduction

Folo is a decentralized project built on the Solana blockchain, combining meme culture, digital art, and collectible NFTs.

The project is based on the idea of a living universe that evolves together with its community.

With each new stage, unique creatures appear — each with its own story, personality, and rarity.

These creatures are more than just symbols — they represent the evolutionary stages of the Folo project and are released as NFT collections on OpenSea.

Each NFT embodies not only artistic value but also the core philosophy of the Folo world — a harmony between creativity, art, and decentralization.

Folo is not just a token. It is an entire universe where creativity drives growth, and the community plays a central role in shaping its future.

As the ecosystem expands, new creatures, new collections, and new chapters will emerge, revealing the deeper story of the Folo Universe and its mysterious realms — including the White Dimension, where the legend first begins.

2. Project Goals

The main objectives of the Folo project are as follows:

- To build an ecosystem featuring unique NFT creatures, each with a limited supply and its own intrinsic value.
- To unite artists, traders, and Web3 enthusiasts within a single creative community.
- To promote the concept of Art-to-Earn, where participation, creativity, and activity are rewarded.
- To strengthen Folo's position as a symbol of creativity, transparency, and authenticity on the Solana blockchain.

3. Folo Tokenomics

The total supply of \$FOLO is 1,000,000,000 tokens.

Community — 90% of the total supply will be allocated entirely to the community.

These tokens will support creative initiatives, community rewards, meme competitions, NFT holders, and ecosystem growth.

Liquidity — 10% will be reserved for liquidity and will remain locked to ensure stability and trust in the project.

Additionally: To reward the earliest supporters and holders of the Folo Creatures NFT collection, a separate Airdrop is planned.

This initiative is part of the incentive program aimed at strengthening the community and expanding the Folo Universe.

4. The Folo Ecosystem

The Folo ecosystem is a living universe that evolves step by step.

With each new stage, new creatures emerge — each representing a part of the project's philosophy, story, and ongoing development.

Each creature possesses:

- its own design, rarity, and personality;
- a unique NFT token, which can be earned or collected;
- a limited supply — the number of each species is strictly fixed.

These NFT creatures form the collectible economy of the project, where rarity and lore determine value.

Some appear only during special events, while others are available exclusively to the earliest members of the community.

Rarity Levels: Common, Uncommon, Rare, Epic, Legendary, Mythical, Divine.

5. Roadmap

Q4 2025

- Launch of the \$FOLO token on the Solana blockchain.
- Initial listings on DEX platforms.
- Release of the Folo Creatures NFT collection on OpenSea.
- Community Airdrop for early supporters.
- Top-10 CEX listing to expand accessibility and liquidity.
- Listing on CoinMarketCap to enhance visibility and transparency.
- The unfolding of Folo's story in the White Dimension, marking the beginning of a new chapter in the Folo Universe.
